ENVIRONMENTAL HEALTH & SAFETY POLICY

ACCUAMX CONTROLS ensures continuous commitment towards creating organized efforts and procedures for identifying workplace hazards and reducing accidents and exposure to harmful situations and substances.

We will always try to include training of personnel in accident prevention, accident response, emergency preparedness, and use of protective gears at work site.

We also ensure HEALTH of each individual by adopting safe, high quality, and environmentally friendly processes, working practices.

We hereby commit ourselves for –

- Follow best industry practices for safety to ensure 'zero harm culture'.

- Comply all environmental norms for reducing pollutions and carbon footprint.

- Ensure environmental quality preservation & sustainable use of natural resources.

- To upgrade periodically and achieve best EHS performance at any work locations.

Accumax Controls also promise for creating a systematic approach to complying with environmental regulations, such as managing waste or air emissions all the way to helping sites reduce the company's carbon footprint.

Our engineering discipline assures that engineered systems provide acceptable levels of safety to extend trust of 'Feel Safe' amongst all stake holders.

….. SAFETY IS ALWAYS A LEAST PAINFUL OPTION …..
